

## Optowire Anchor clamp

### Anchor clamp PA-08/PA-09

The anchor clamp **PA-08/PA-09** is intended for tension fastening of 8-shape fiber optic cable with an external strength member. It is used for cable with the strength member made of a steel rope messenger.

The clamp consists of an open conical body reinforced with ribs, a pair of toothed metal wedges (clamp assembly) and a flexible loop. The clamp is installed in pairs at the beginning, end and within the interval of 3-10 mm. poles along the cable line.

## TECHNICAL SHEET

Type	Anchor clamp PA-08	Anchor clamp PA-09
Material	high strength aluminum alloy	
Loop Type	stainless steel (zinc)	
Cable OD (mm)	3-7	5-10
MTL (kN)	6	8
Operating temperature(°c)	-20 ~ 50	
Installation temperature(°c)	-20 ~ 50
