

## ***Smart Lock VIV-I10 Pro***

The VIV-I10 is a high-security, smart door lock that combines advanced biometric and smart technology for convenient and versatile access. It supports fingerprint scanning, IC card access, password/PIN code entry, key override, plus control via the Tuya app over Wi-Fi. It's designed for steel or wooden doors and made of durable materials (aluminum alloy) with a robust mortise for security. The lock is powered by a rechargeable battery and promises many unlock cycles.

### ***Features***

- Fingerprint / IC Card / Password / Physical Key / Tuya App control
- For wood doors or steel doors; fits door thickness around 45-65 mm
- Material & Build Aluminum alloy body, mortise type “6068 without hook”
- DC 7.4V, 4200mAh; allows ~7000 normal unlocks, which corresponds to roughly 10-12 months depending on usage
- Wi-Fi via Tuya app; supports cloud or network data storage
- Color / Grey

## Specifications

Material	Aluminum Alloy
Surface Finishing	Electroplated
Unlock Way	App, Password, Fingerprint, IC Card, Wristband or Key
APP Name	Tuya App
Support System	IOS 7.0 or Android 4.4 or above
Operating Voltage	DC 7.4V 4200mAh
Mortise	6068 series mortise
Working Current	-25°C~55°C
Operating temperature	40 – 90mm
USB Back Up Power	YES
Dimensions	L430x W75.8mm
Applicable For	Wooden or Metal door
