

Tension Load Spirial Clamp Guy Grip

Spiral clamp (**GUY GRIP**) is designed for mounting a self-supporting fiber optic cable to the light poles, towers of high-voltage lines, the contact networks of railways, buildings and structures. The clamp consists of a power section, which is a U- shaped strand of several spiral wires, fastened together with a special solution, on the inside of which an abrasive is applied. The protector for additional protection of the cable is a set of individual spirals or glued

TECHNICAL SHEET (500mm)

Cable OD (mm)	4.6-5.1	5.1-5.6	5.7-6.2	6.3-7	7-7.8	7.8-8.6	8.7-9.6
Material	Galvanized steel wire						
Spring diameter (mm)	1.8	2					
Number of springs	4						
Power spiral length (mm)	500						
MTL (kN)	2						
Operating temperature(°c)	-40 ~ 70						
Installation temperature(°c)	-40 ~ 70
